Using the data below and whatever version of angular you prefer, build the following component.

- The button does not need to go anywhere, just trigger a page alert to say it's been clicked.
- The assets required are attached.
- IsAwardWinner causes the little badge to appear beside the avatar image
- The star rating below the avatar should appear if the value is higher than 2

Data

```
{
  "Results":[
    {
      "Name":"Bon Jovi",
      "IsAwardWinner":false,
      "Agency":{
        "Name":"The fancy agency company",
      },
      "Theme":{
        "AvatarImage":"pick any image to use as an avatar",
      },
      "AverageSalePrice":502664.13,
      "SoldProperties":152,
      "TotalReviews":0,
      "StarRating":1.0
    },
    {
      "Name":"Teddy Scott",
      "IsAwardWinner":true,
      "Agency":{
        "Name":"A fancier agency",
      },
      "Theme":{
        "AvatarImage":"pick any image to use as an avatar",
      },
      "AverageSalePrice":627586.74,
      "SoldProperties":125,
      "TotalReviews":174,
      "StarRating":5.0
    }
  ]
}
